How much longer will Almighty God allow the USA (and the rest of the world) to go on without receiving a HUGH chastisement? Is the USA the "land of the free and the home of the brave" or is it not rather the "land of the deceived and the home of the slaves?" Now those living in the USA will once more be deceived into paying for MANY murders with tax and insurance money. Americans, whether they like it or not, are year by year becoming greater enslaved to the evil forces controlling them.

Obamacare Will "Railroad" Americans into Paying for Abortions on October 1

by Steven Ertelt | Washington, DC | LifeNews.com

9/17/13

During a private event for pro-life leaders on the deadly impact of Obamacare, the head of a national pro-life group said Americans will be forced to pay for abortions starting on October 1.

"The anti-life policies of Obamacare intertwined throughout healthcare at the personal, business, state and federal levels make it nearly impossible for an increasingly pro-life American public to avoid paying for life-ending events," Americans United for Life president Charmaine Yoest said during the event.

Yoest observed that October 1 marks another significant anti-life impact of the healthcare law.

She said that, on October 1, many Americans will be railroaded into paying directly for abortions with their insurance premiums – sometimes without their knowledge and consent. And the nation's largest abortion business, Planned Parenthood, earns even more money as "navigators," signing people up for insurance. Planned Parenthood has already racked up more than $1 million in taxpayer funds to sign people up for Obamacare.

Yoest said that a major change in the healthcare law is the fact that taxpayer funding will be used to help pay for insurance plans that cover abortions. In other government programs, plans are not permitted to include abortion coverage. Obamacare goes in an entirely different direction, creating a presumption that insurance plans in the new state Exchanges are permitted to cover abortion unless states prohibit it.

"Anyone with e-mail understands what it means when you are signed up – opted in – to a list without your consent. For the first time in U.S. History, Obamacare opts in almost every America to all kinds of abortion-related policies, intertwined at multiple levels. And if you try to opt-out, the answers for many has been NO, and the punishments severe," Yoest said.

But the HHS mandate, forcing religious employers to pay for birth control and abortion-causing drugs, is another headache for pro-lifers.

"Too little attention has been paid to Obamacare's deliberate job-killing fines imposed on those who do not want to embrace the Obama Administration's anti-life agenda," Yoest said. "Right now, family-run businesses are fighting in the courts to protect their First Amendment Conscience Rights and protect their companies from punishing fines, all because they do not want to pay for life-ending drugs and devices."

AUL currently has filed 16 amicus curiae briefs aimed at protecting the First Amendment Conscience Rights of Americans who do not want to purchase life-ending drugs or devices.

"You could call the Affordable Care Act the 'Abortionist Full-Employment Act' given all the new income flowing to the abortion lobby, over the objection of an increasingly pro-life America," Yoest said. "While defunding the law is a good place to begin, that won't solve the layers of anti-life mandates impacting ordinary Americans. Repealing Obamacare is the only way to ensure that life is protected from its intrusive policies."

The AUL president said the HHS Preventive Care guidelines (which adopt the FDA's mislabeling of abortion-causing drugs like ella as contraception, and then require their coverage as preventive care) have been in place since August 2012 but its coercive reach continues to expand. Each month, more private insurance plans are required to comply with the anti-life mandate when they lose their "grandfathered" status.

Ultimately, Yoest says abortion is woven into the healthcare law at multiple levels, making repeal of the law a pro-life necessity, including:

- Allowing the use of federal tax dollars for abortion, abortion coverage and abortion inducing drugs and devices.
- Including a "Covert Abortion Premium Mandate" within Exchange plans that include abortion coverage.
- Pretending that the Hyde Amendment protections were enough to prohibit direct payment for abortions.
- Permitting federally subsidized Qualified Health Plans (QHPs) to provide abortion coverage through the state insurance exchanges.
- Failing to prohibit all multi-state qualified health plans from providing coverage for abortion.
- Mandating coverage of drugs and devices known to end unborn life through the guise of "preventive care."
- Failing to provide comprehensive First Amendment conscience protections for individuals, employers, and insurance companies that have religious or moral objections to abortion.

Consider that you owned a Thoroughbred racehorse mare that just became pregnant with her colt. If another person offered you one million dollars for the colt that is still unborn in its mother's womb, would you be able to convince yourself that unborn creatures do not have life? How can unborn animals be of more importance than unborn human babies created in God's own image and likeness?

If you knew of someone being caught by eyewitnesses murdering another human being, would you agree that the murderer should be condemned and punished for his crime? According to the Statistics **Approximately 42 million abortions occur every year worldwide, and 4,000 to 5,000 EVERY DAY just in the USA!** Why are the thousands of doctors and nurses performing these murders not condemned and punished for their crimes? Well, God will condemn and punish them for an eternity if they do not repent!

Statistics

Abortion is a controversial issue that many are happy to avoid. As caring human beings, we can't afford this luxury. Too many new mothers are given the false hope that abortion is the solution to all their problems.

Many new parents don't know how *developed their children* are when they choose abortion. Since Roe v. Wade, in 1973, over 48 million choices have been made that have resulted in the deaths of unborn children. Think about what this means and what it will continue to mean to all of us if we can't change things.

Over 1.29 million people were killed through abortion in the United States in 2002. (1)

Over 48 million people have been killed through abortion in the United States since the Roe vs. Wade decision. (2)
Approximately 42 million abortions occur every year worldwide. (3)
Abortion killed 73 times more Americans than died in battle in our last 12 wars combined. (4)
To equal the average number of abortion deaths in one year, the terrorist attacks on the World Trade Center would have had to have been more than 400 times more lethal.

48 million people equals approximately 16 percent of the current population of the United States.
The number of people killed by abortions since 1973 exceeds the current populations of each of the 50 states, including California.
Almost 1 out of every 4 American babies is aborted. (1)
This number is greater than the current populations of Sweden, Norway, Lithuania, Latvia, Ireland, Iceland, Finland, Estonia, and Denmark COMBINED.
It would have taken about 342 Hiroshima type nuclear attacks to kill as many people as abortion has killed since Roe vs. Wade.

Facts

Abortion is inherently unsafe to the mother.
Physical problems from abortion can include hemorrhage, infection, sterility, and even death.
Psychological effects can include depression and mental trauma to divorce and suicide.
Women often experience "severe" or "intense" pain during an abortion.
The psychological effects of an abortion are so well documented that psychologists have grouped them under one name: post-abortion syndrome (PAS). Women may experience symptoms of PAS right after the abortion, but oftentimes, PAS does not manifest itself until many months or years after the abortion.
Symptoms of PAS are: recurrent memories, dreams of the abortion experience, avoidance of emotional attachment, relationship problems, sleep disturbance, guilt, memory impairment, hostile outbursts, and substance abuse.
Fathers, grandparents, and siblings can also experience the psychological effects of abortion.
