

Monster deer or monster liar!

Above is a picture of the new world record whitetail buck. It was taken by the cousin of a co-worker's sister's uncle's best friend's son-in-law's niece's hairdresser's neighbor's ex-boyfriend's oldest nephew. Reportedly it will score 2603-1/8 by B&C standard. I shot this deer in West Texas on a really windy day, 85 degrees downhill, around a curve at 900 yards with a .22 cal. rifle.

Supposedly, this deer had killed a Brahma bull, two Land Rovers, and six Jehovah's Witnesses in the last two weeks alone. It was winning a fight with Bigfoot when I shot it. It has also been confirmed that the buck had been seen drinking discharge water from a nuclear power plant.

All this has been checked and confirmed by my friends at Snopes. Also, I remind you one more time. If you like your insurance policy you can keep your insurance policy.

Honestly and Sincerely,
Barack H. Obama
