How to change the print size of text on a web site.

   In most cases you can make the print size on this web site, and other web sites, larger or smaller by holding down the Ctrl (Control) key on your keyboard, and then roll the wheel on your mouse. Note however, that if you increase the print size, you might have to make it smaller again to view all of the information in the drop down menu when you roll over the tab(s)
